## Course overview

This course provides a comprehensive grounding in theory and practice, and an excellent foundation to becoming a qualified accountant. With an opportunity to secure exemptions from all of the major professional accountancy bodies, successful graduates will keep their careers options open in accounting, business and finance.

There is a considerable demand for accountants in business, industry and the public sector. Upon graduation you should find your new found knowledge and skills in demand with a wide range of employers. You will be empowered to embark immediately on a professional career in accountancy or to undertake further study at master's level.

## Example modules

Modules studied may include: Introductory Accounting; Academic, Professional & Managerial Awareness; Financial Mathematics and Statistics; Business & the Economy; Principles of Financial Accounting; Principles of Management Accounting; Financial Accounting; Management Accounting; Personal & Business Finance; Law for Accountants; Career Entrepreneurship; Assurance & Risk Management; Modern Taxation; Performance Management; Financial Reporting; Auditing; Governance, Risk & Ethics, and Advanced Financial Management.

## What our students say

“If I could sum up the Ulster University experience in three words, I would describe it as: fresh, friendly and supportive.”

Mohamed Said – Egypt
